

Leadership and Management Projects

Teferi Tsegaye

Issue:

- (1) To increase student enrollments in the department and enhance the non-viable degree programs; and
- (2) Establish a new Environmental Health Science accredited program in the department.

What has been done;

- (1-1) Improve student recruitment and retention strategies (developed new departmental brochures and other materials targeting each program areas
 - (1-2) increased the number of recruitment trips to high schools and junior colleges (targeting transfer potential students).
 - (1-3) increased the number of grants and scholarship to support and provide stipends to undergraduate student (bi-weekly student support and scholarships)
-
- (2-1) Received accreditation by the EHAC the EHS program in the department of NRES/AAMU.
 - (2-2) increased the number of Summer Internship for undergraduate students (CDC, Dauphin Island Sea lab
 - (2-3) the first EHS major graduated this past may and we are waiting to get our full accreditation this summer by the NEHA

Mentoring:

I am constantly visiting and meeting with my mentor to get personal coaching and advice. The mentoring program is helping me so much to improve my day to day leadership/management role in the department.
