

What thoughts has this discussion triggered about the future of Research:
We need to innovate in our research partnerships, and stretch ourselves further into transdisciplinary research to maximize and tap into new resources.
Science literacy is key to the future of research at the land grants.
Unique Partnerships
Moderize
Inclusion, utilization of resources, collaboration, data driven, break down silos
Collaboration is key; innovative models of funding and partnerships; take risks
Flexibility and partnerships
4-H, master gardener, public private partnership, our job is to deliver the mission
Transdisciplinary, multi-state, collaborative, leveraged funding, innovative
Increased academia-government-industry partnership
LOOK FOR WAYS TO SHOW RELEVANCE
Develop collaborative and integrated research, thus enabling resource attraction from diverse stakeholders.
P&T eval must conform to LG mission institute-wide
